General Instructions:

1. This paper carries 120 multiple choice questions; 30 each in Physics, Chemistry, Botany and Zoology.

- 2. The test is of 2 hr duration. Each question carries 4 marks. For each correct response, the candidate will get 4 marks. For each incorrect response, 1 mark will be deducted from the
- appropriate alternative as your answer.
- total scores. 3. Each question is followed by four alternatives as suggested answers. Mark the most Only one alternative is to be selected. 4. A force of 5 N acts on a particle along a direction making an angle of 60° with vertical. Its 1. vertical component be (1) 10 N(2) 3 N(3) 4 N (4) 2.5 N A hall has the dimensions 10m x 12m x 14m. A fly starting at one corner ends up at a diametrically opposite corner. What is the magnitude of its displacement (1) 17 m (2) 26 m (3) 36 m (4) 20 m 3. Any vector in an arbitrary direction can always be replaced by two (or three) (1) Parallel vectors which have the original vector as their resultant (2) Mutually perpendicular vectors which have the original vector as their resultant (3) Arbitrary vectors which have the original vector as their resultant (4) It is not possible to resolve a vector The angle between the two vectors $\vec{A} = 3\hat{i} + 4\hat{j} + 5\hat{k}$ and $\vec{B} = 3\hat{i} + 4\hat{j} - 5\hat{k}$ will be (1) 90° $(2) 0^{\circ}$ (3) 60° (4) 45° If the sum of two unit vectors is a unit vector, then magnitude of difference is 5.
- (2) $\sqrt{3}$ (3) $1/\sqrt{2}$ (1) $\sqrt{2}$ (4) $\sqrt{5}$ A particle has displacement of 12 m towards east and 5 m towards north then 6 m vertically upward. The sum of these displacements is
 - (4) None of these (1) 12 (2) 10.04 *m* (3) 14.31 *m*

82. Select an incorrect statement for lichen

- (1) Fungi provide shelter and absorb mineral nutrients and water
- (2) Lichens grow in polluted areas
- (3) The fungal component is called mycobiont
- (4) The algal component is known as phycobiont
- 83. Which of the following statement for fungi is false?
 - (1) Reproduction in fungi can take place by vegetative means
 - (2) Most fungi absorb soluble organic matter from dead substrates
 - (3) some fungi have septae or cross walls in their hyphae
 - (4) They prefer to grow in warm and dry places
- 84. Which of the following statement for fungi is false?
 - (1) Fusion of protoplasms between two motile or non-motile gametes called plasmogamy
 - (2) Fusion of two nuclei called karyogamy.
 - (3) Meiosis in zygote resulting in haploid spores
 - (4) Most fungi are parasites
- 85. Which of the following statement for fungi is false?
 - (1) both saprophytic and parasitic fungi can also live as symbionts
 - (2) sexual reproduction is by oospores, ascospores and basidiospores
 - (3) Asexual reproduction is by spores called conidia
 - (4) Members of phycomycetes are found in aquatic habitats
- 86. The sexual cycle in fungi does not involves
 - (1) Fusion of protoplasms between two gametes called
 - (2) Fusion of two nuclei
 - (3) Meiosis in zygote
 - (4) formation of fruit

- 87. Study the four statements (A-D) given below and select the two correct ones out of them
 - A. Definition of biological species was given by Ernst Mayr.
 - B. Photoperiod does not affect reproduction in plants
 - C. Binomial nomenclature system was given by R.H. Whittaker.
 - D. In unicellular organisms, reproduction is synonymous with growth

The two correct statements are

- (1) B and C
- (2) C and D
- (3) A and D
- (4) A and B

- 89. Which of the following statement for fungi is false?
 - (1) In some fungi the fusion of two haploid cells immediately results in diploid cells
 - (2) in ascomycetes and basidiomycetes, an dikaryotic stage occurs
 - (3) mode of spore formation form the basis for the division of the kingdom into various classes.
 - (4) sexual reproduction is by oospores, ascospores and sporangiospores
- 90. Which of the following statement for fungi is false?
 - (1) Meiosis in zygote resulting in haploid spores
 - (2) Fusion of two nuclei called plasmogamy
 - (3) Fusion of protoplasms between two motile or non-motile gametes called karyogamy
 - (4) both (2) and (3)
- 91. What will be the correct sequence of % weight of elements in human body?
 - (1) Na > K > O > C
- (2) C > H > O > N
- (3) H > N > Na > S
- (4) O > C > N > S
- 92. Identify the incorrect statement:
 - (1) All the carbon compounds obtained from a living tissue are termed as bio-molecules
 - (2) In human body, S is less abundant than Ca
 - (3) In a cell, carbohydrates are more abundant than proteins
 - (4) Lipids are found in acid insoluble fraction

93.	Correct sequence of % mass of components in a cell is:
